

ACCUSHOOT LFX

AccuShoot LFX – Law Enforcement Edition

Efficient and effective firearms training for better performance

Imagine a training range where dynamic, moving digital targets challenge your officers' marksmanship and decision-making. Where every shot — its X, Y, and timestamp — becomes actionable data you can track, analyze, and use to measure progress. Where officers train with their own firearms, ammunition, and gear — or safely practice with laser systems. Where you can run advanced tactical scenarios for SWAT teams, or accelerate new recruits' development through data-driven training. Where you can design custom drills and realistic,

scenario-based exercises for your entire unit.

Stop imagining. Now you can transform any range — indoor or outdoor — into that next-generation training environment with **AccuShoot LFX**.

Admired by elite forces worldwide, **AccuShoot LFX** empowers your officers with the skills, confidence, and precision to perform more effectively in the field — enhancing readiness, safety, and operational performance.

LFX Live-Fire Experience

Training with dynamic targets & real-time scoring

- ✓ **Transformative Training Experience:** Combine the immediate gratification of steel targets with the accountability and precision of paper targets, making every session challenging, engaging, and enjoyable.
- ✓ **Limitless Drills:** Access new drills and scenarios added weekly, or create your own custom exercises tailored to your unit's needs.
- ✓ **Advanced Analytics & Personalized Profiles:** Record every shot placement, delivering a wealth of analytics for detailed performance assessment. Track critical metrics for every officer, weapon, and session, and predict future performance trends to guide training decisions.

- ✓ **Portability, Adaptability & Extensibility:** Easily transport, configure, and deploy on any range — from small indoor facilities to long-range outdoor courses. Start with one LFX and scale up to multiple interconnected units with **MFX** for networked, multi-lane training.

DFX Dry-Fire Experience

Train smarter, safer, and ammo-free

- ✓ **Dual Operation:** Train with the same system and drills for both live fire (**LFX**) and dry fire (**DFX**), providing maximum flexibility.
- ✓ **Cost-Effective:** Gain all the benefits of an advanced simulator at a fraction of the cost of traditional systems.

YFX Yonder Fire Experience

Precision training for long-range and sniper scenarios

YFX extends LFX training beyond standard distances, accurately tracking every impact for precision rifle and sniper applications. Dynamic targets, live telemetry, and full instructor control are fully preserved at extended ranges — hundreds of meters and beyond, wherever line-of-sight and sighting conditions allow.

Ruggedized enclosures and off-grid power options make YFX deployable in remote or harsh environments. When paired with MFX, YFX enables coordinated long-range exercises, team drills, and synchronized engagements for tactical units and SWAT teams.

MFX Multi-Fire Experience

Coordinated, instructor-driven training across multiple systems

The MFX (Multi-Fire eXperience) module links multiple LFX and DFX systems — indoors, outdoors, or for long-range — enabling advanced, synchronized training scenarios.

Key Modes:

- ✓ **Replicated Drills:** Run the same drill simultaneously across all systems. *Example: N officers qualifying at once.*
- ✓ **Sequential Drills:** Execute stages in a predefined, chained order. *Example: Multi-stage competitions.*
- ✓ **Parallel Drills:** Each system runs a different drill while results are aggregated globally. *Example: Shoot house with independent scenes.*
- ✓ **Adaptive Drills:** Actions on one system trigger real-time effects on others. *Example: Hitting a target on one screen changes connected screens.*
- ✓ **Distributed Drills:** Execute a single drill across multiple systems simultaneously. *Example: Coordinated hunting/search scenarios.*

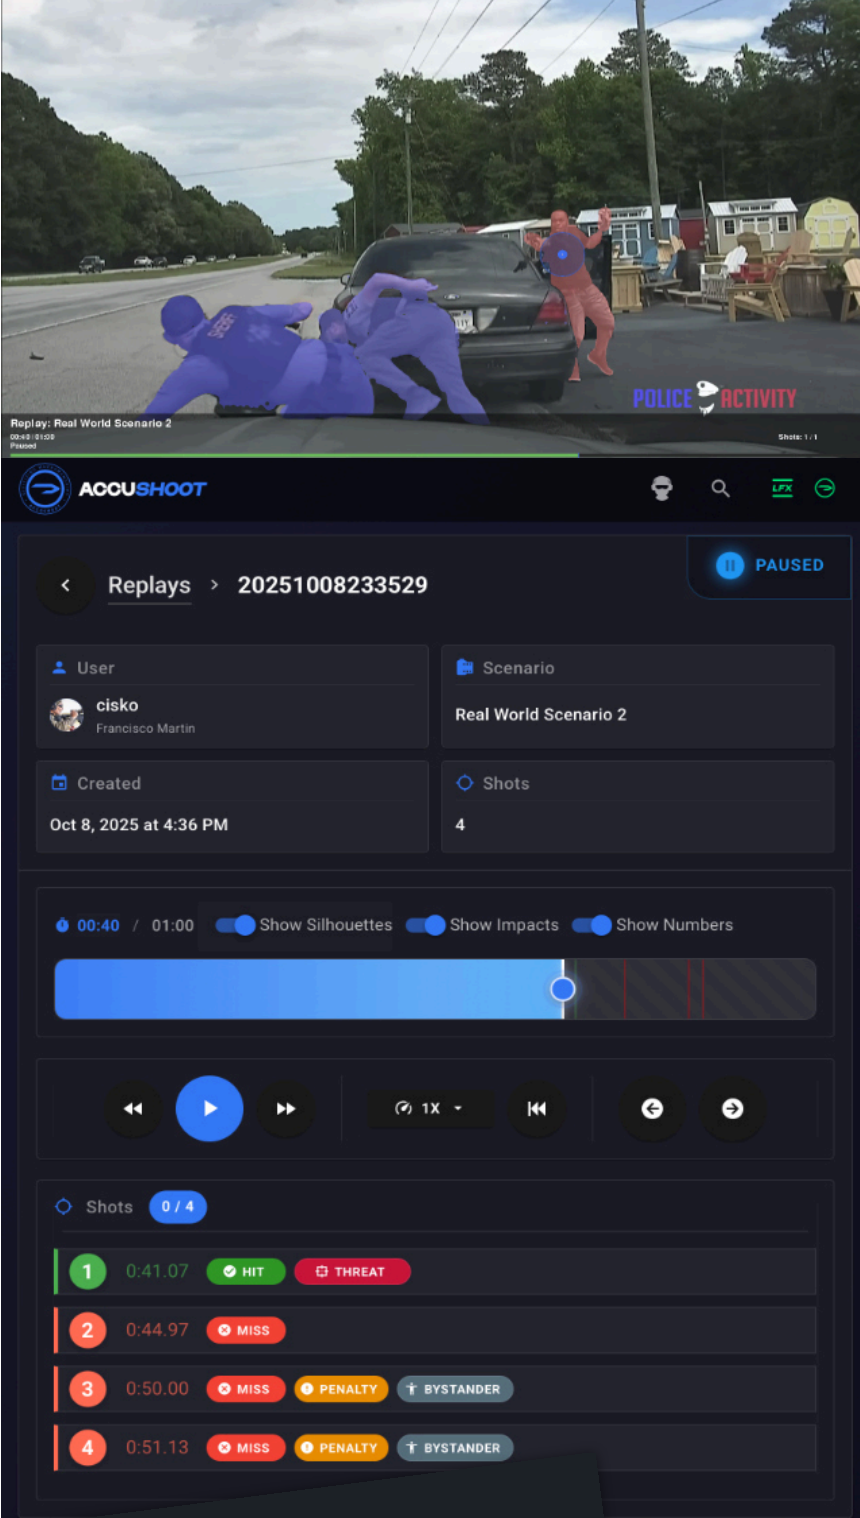

Scenario Replays

Performance is only as good as the feedback you receive. The **LFX/DFX Replay system** lets instructors and officers review entire scenarios — whether real-world, dramatized, or fictional. Every shot is tracked with precise timing, accuracy, and decision-making metrics.

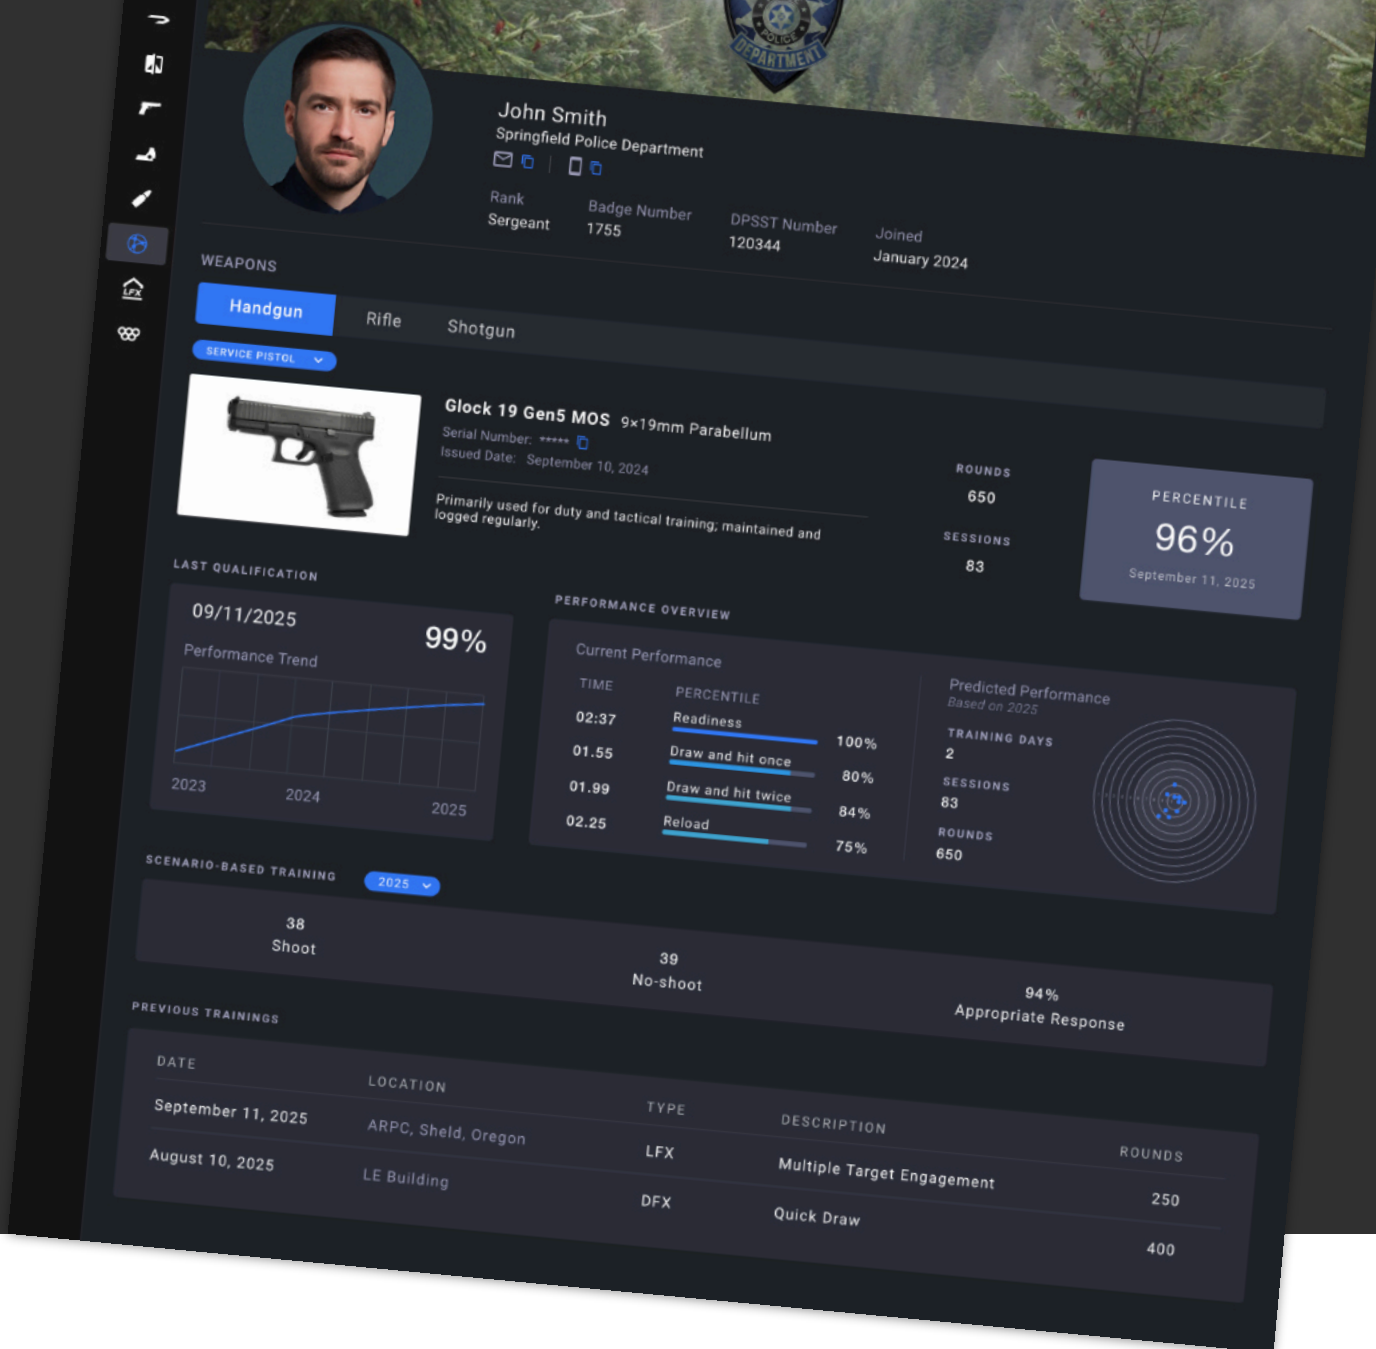

Enhanced Replay Features:

- ✓ **Shot Markers:**
Visualize exactly where each shot landed.
- ✓ **Timeline Playback:**
Step through scenarios in real time or slow motion.
- ✓ **Mask View:**
Highlight critical areas and characters — Suspects, Threats, Potential Threats, Bystanders, and Partners.
- ✓ **Integrated Metrics:**
Access reaction times, split times, accuracy scores, and other performance indicators.
- ✓ **Instructor Annotations:**
Add notes, highlight zones, and mark actionable feedback.

These tools allow instructors to pinpoint exactly what happened, identify skill gaps, and provide targeted coaching to improve decision-making and maximize training outcomes.

QUALIFICATIONS			SERVICE PISTOL		ROUNDS FIRED	QUALIFICATION SCORE
#	NAME	RANK				
1	Sgt. John Smith	Sergeant	Glock 19 Gen5 (9mm)		650	99%
2	Ofc. James Whitaker	Senior Patrol Officer	SIG Sauer P320 (9mm)		420	97%
3	Lt. Ethan Brooks	Lieutenant	Smith & Wesson M&P 2.0 (9mm)		965	95%
4	Ofc. Danielle Parker	Patrol Officer	Glock 17 Gen5 (9mm)		590	94%
5	Cpl. Ryan O'Connor	Corporal	SIG Sauer P320 (9mm)		815	92%
		Sergeant	Smith & Wesson M&P 2.0 (9mm)		365	90%
					1025	88%

Why LFX for Law Enforcement?

- ✓ **Automated Training Logs:**
Capture every session for full accountability and reporting.
- ✓ **Objective Qualifications & Certifications:**
Standardize scoring and track officer progress reliably.
- ✓ **Individual Officer Profiles:**
Monitor performance over time, identify strengths, and target areas for improvement.
- ✓ **Adaptable Scenarios:**
Configure for the most demanding training exercises, from recruit development to SWAT operations.
- ✓ **Cost-Effective Training:**
Combine dry-fire practice with measurable live-fire experience, maximizing skill development while minimizing range time and expenses.

Why Officers and Instructors Love AccuShoot

- ✓ Real gear, real ammo, real feedback — no forced simulators.
- ✓ Live-fire and dry-fire integration for maximum flexibility.
- ✓ Detailed analytics to track performance, predict skill growth, and plan development.
- ✓ Customizable scenarios for recruits, SWAT, and tactical units.
- ✓ Portable, scalable, and adaptable to any environment—indoor, outdoor, or remote.
- ✓ Scenario replay and multi-system coordination (MFX) for team training and operational drills.
- ✓ Continuous updates with new drills and exercises, keeping training fresh and challenging.
- ✓ Affordable, data-driven, and built for law enforcement efficiency and effectiveness.
